MULTI-BOARD SYSTEM DESIGN IN THE DIGITAL ENTERPRISE

Dear Sir or Madam,

How do you design a system today - a system containing several PCBs, cables and connectors?

Did you know Xpedition Systems Designer changes the paradigm of **multi-board system design** by integrating **system definition, PCB design, connector management, cable & harness design** in a common platform, with automatic data exchange?

Learn about this and other topics by watching the online resources (recorded seminar and demonstration) or, alternatively, by attending one of the **PCB Systems Forum 2018** events being held in several locations across Europe.

You may find the 2018 calendar of our public workshops and trainings 2018 on our website, as usual.
We offer these as in-house trainings as well - please contact us to discuss your requirements!

Best regards,
Mircea Slanina
