

DFM ANALYSIS AND AUTOMATIC PCB DOCUMENTATION

Dear Sir or Madam,

We are happy to invite you to attend two upcoming live webinars - free of charge.

1) Eliminate design for manufacturing issues with CAM350/DFMStream

Running DFM analysis in-house, before sending the design to manufacturing, eliminates most of the problems that block production and cause iterations between you and your PCB manufacturer.

2) Automatically create and update PCB manufacturing documentation with Blueprint

There is a way to simplify the tedious task of creating PCB Documentation. Not only does this revolutionary method save you time, but it also streamlines the transfer of instructions from design to assembly and manufacturing. Discover how Blueprint will change the way you create, distribute and use PCB Documentation.

During either webinar, you will also discover the new major features brought by Release 2018.

**Tuesday, 26 February @ 16:00
EET
CAM350 / DFMStream Webinar**

REGISTER

**Wednesday, 27 February @
16:00 EET
BluePrint-PCB Webinar**
