

DEZ | 2021 - Seasons Greetings

TRIAS mikroelektronik would like to wish you, your families and colleagues a Merry Christmas and Happy New Year.

Corona has continued to turn many things upside down, and unfortunately it remains a big concern. However, it is well known that a crisis is always an opportunity. In 2021 we had plenty of reasons to think about this wisdom - and came to the conclusion: It's true!

We continued some projects that in "normal times" might have been lost in everyday business. We have greatly expanded our TRIAS Medi@thek ([go and have a look again!](#)) and also the [trainings](#) we can offer. Our online courses are becoming more and more popular, and FPGA Verification Day being held online was also a great success.

Now it is finally time to lean back a little and enjoy what has been achieved. And so we are going towards the new year with positivity and look forward to our continued cooperation.

Seasons Greetings from all of us at TRIAS

Best regards and stay safe

Pia Pacovsky
